

MiTOWER CONNECT

Working platform between two MiTOWERS

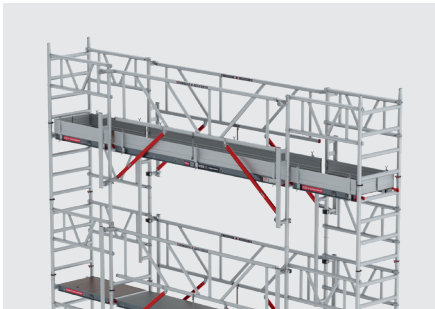

- Working platform between two MiTOWERS
- Strong, sturdy and lightweight
- Suitable for MiTOWER and MiTOWER PLUS

EN 1004-1

EN 1004-2

The MiTOWER CONNECT is a useful addition to the MiTOWER or MiTOWER PLUS. You can build a working platform between two tower with a limited number of parts in a short time. It's allowed to assemble the MiTOWER CONNECT by a single person, until a working height of 20 ft.

Create a larger working platform with standard parts

The working platform can be created from guardrail support stands (301227) in combination with SQ guardrail attachments for walkthrough frame (301228). Next to that you would need a walkthrough frame, RS5 platforms and Safe-Quick® GuardRails.

MiTOWER CONNECT

Platform height (m)	7 ft	14 ft
Working height (m)	14 ft	20 ft

Description

Walkthrough frame MiTOWER	0	2
Guardrail support stand	4	4
